## REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: claims 12-14 are patentable over the prior art patents and printed publications because of the laser imager includes a reflection type spatial modulator, which receives a laser beam emitted from a laser light source and bended by a first optical system to generate a modulated laser beam, which is further bended and focused by a second optical system onto the surface of an image recording medium, wherein the reflection type spatial modulator comprises reflecting ribbons arrayed in parallel and a protective glass window a small distance from the reflecting ribbons, and wherein an optical axis of the laser beam incident onto the reflection type spatial modulator forms a nonzero angle with the normal to the reflection type spatial modulator, whereby interference between the first optical reflection at the reflecting ribbons and the second optical reflection at the window glass is prevented. The combined limitations are not taught by the art of record alone or in combination.

Claims 2-4, 6-7 and 9-11 are allowed because they are directly or indirectly dependent from claims 12-14 above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
